

10. ReactJS-HOL

App.jsx

```
import './App.css';

const element = 'Office Space';

const officeImage = (
  
);

const ItemName = { Name: 'DBS', Rent: 50000, Address: 'Chennai' };

const officeList = [
  { Name: 'DBS', Rent: 50000, Address: 'Chennai' },
  { Name: 'TCS', Rent: 75000, Address: 'Bangalore' },
  { Name: 'Infosys', Rent: 45000, Address: 'Pune' },
  { Name: 'Wipro', Rent: 62000, Address: 'Hyderabad' },
];

function App() {

  let colors = [];
  if (ItemName.Rent <= 60000) {
    colors.push('red');
  } else {
    colors.push('green');
  }

  return (
    <div className="App">
      <h1>{element} , at Affordable Range</h1>
    </div>
  );
}
```

```

    {officeImage}

    <h1>Name: {ItemName.Name}</h1>
    <h3>
      Rent: Rs. <span style={{ color: colors[0]
}}>{ItemName.Rent}</span>
    </h3>
    <h3>Address: {ItemName.Address}</h3>

    <hr />

    <h2>More Office Spaces</h2>
    {officeList.map((item, index) => {
      const rentColor = item.Rent <= 60000 ? 'red' : 'green';
      return (
        <div key={index} className="office-item">
          <h3>Name: {item.Name}</h3>
          <h4>
            Rent: Rs. <span style={{ color: rentColor
}}>{item.Rent}</span>
          </h4>
          <p>Address: {item.Address}</p>
        </div>
      );
    })}
  </div>
);
}

export default App;

```

Output

Office Space , at Affordable Range

Office Space

Name: DBS

Rent: Rs. 50000

Address: Chennai

More Office Spaces

Name: DBS

Rent: Rs. 50000

Address: Chennai

Name: TCS

Rent: Rs. 75000

Address: Bangalore

Name: Infosys

Rent: Rs. 45000

Address: Pune

Name: Wipro

Rent: Rs. 62000

Address: Hyderabad
