

11. ReactJS-HOL

ProjectStructure

CurrencyConvector.jsx

```
import React from 'react';

const CONVERSION_RATE = 90;

export class CurrencyConvector extends React.Component {
  constructor() {
    super();
    this.state = {
      amount: '',
    };
  }

  this.handleChange = this.handleChange.bind(this);
  this.handleSubmit = this.handleSubmit.bind(this);
}

handleChange(event) {
  this.setState({ amount: event.target.value });
}
```

```

handleSubmit(event) {
  event.preventDefault();
  const euroAmount = (this.state.amount / CONVERSION_RATE).toFixed(2);
  alert(`Converting to Euro Amount is ${euroAmount}`);
}

render() {
  return (
    <div className="currency-convertor">
      <h2>Currency Convertor!!!</h2>
      <form onSubmit={this.handleSubmit}>
        <label>
          Amount (INR):{' '}
          <input
            type="number"
            value={this.state.amount}
            onChange={this.handleChange}
          />
        </label>
        <br />
        <button type="submit">Convert</button>
      </form>
    </div>
  );
}
}

export default CurrencyConvertor;

```

EventExamples.jsx

```

import React from 'react';

export class EventExamples extends React.Component {
  constructor() {
    super();
    this.state = {
      count: 0,
    };
  }

```

```
this.increment = this.increment.bind(this);
this.decrement = this.decrement.bind(this);
this.sayHello = this.sayHello.bind(this);
this.sayWelcome = this.sayWelcome.bind(this);
this.onPress = this.onPress.bind(this);
}

increment() {
  this.setState((prevState) => {
    return { count: prevState.count + 1 };
  });
  this.sayHello();
}

decrement() {
  this.setState((prevState) => {
    return { count: prevState.count - 1 };
  });
}

sayHello() {
  alert('Hello! Member!');
}

sayWelcome(message) {
  alert(message);
}

onPress(e) {
  alert('I was clicked');
}

render() {
  return (
    <div className="event-examples">
      <h2>Counter: {this.state.count}</h2>

      <button onClick={this.increment}>Increment</button>
      <button onClick={this.decrement}>Decrement</button>
    </div>
  );
}
```

```

        <br />

        <button onClick={() => this.sayWelcome('welcome')}>Say
Welcome</button>
        <br />

        <button onClick={this.onPress}>Click on me</button>
    </div>
    );
}
}

export default EventExamples;

```

App.jsx

```

import EventExamples from './Components/EventExamples';
import CurrencyConvertor from './Components/CurrencyConvertor';
import './App.css';

function App() {
    return (
        <div className="App">
            <EventExamples />
            <hr />
            <CurrencyConvertor />
        </div>
    );
}

export default App;

```

Output

localhost:5173 says

welcome

OK

Say Welcome

Click on me

Currency Converter!!!

Amount (INR):

Convert

localhost:5173 says

Converting to Euro Amount is 2.58

OK

Say Welcome

Click on me

Currency Converter!!!

Amount (INR):

232

Convert
